

Validation

Sam's boss told him to use validation in the new database he was setting up.
Sam has no idea what his boss means.
Explain to Sam the meaning of the term 'validation'

Sam told his boss today that he will use validation in the database to make sure that there are no mistakes and that all data will be correct.

Sam's boss shook his head and told him that wasn't possible.

Explain what Sam's boss meant by this.

Sam's boss wants him to list the validation techniques he will use in his database. He also wants Sam to give him an example of each type.

Sam is a bit stuck. Help him to compile his list.
